HAPPY COLOR

colors your most emotional memories

What color are your emotions?

Our Research&Development laboratory has created five colors especially for you. Five colors, intense like your most emotional memories, that you will want to include in your HAPPY COLOR

HAPPY COLOR is a professional photo album with an extremely versatile coordinated box.

Perfect for recounting the arrival of a baby, a baptism, a first communion, a confirmation, an unconventional wedding, an event or a special photo shoot.

HAPPY COLOR offers various creative possibilities.

You can choose from:

- 5 colors
- 4 formats
- 3 print technologies
- 5 types of paper

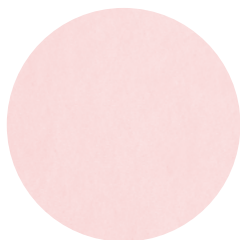

Faux-leather

The front of the HAPPY COLOR photo album is covered in faux-leather, soft to the touch and customized with Debossing, a process that makes an indent in the material, creating a slight lowering of the surface where there is the design and lettering.

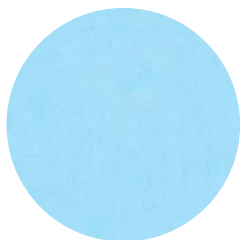

The spine and the back of the cover are covered in organic cotton with a Salt and Pepper texture.

Remember: all the HAPPY COLOR photo albums are supplied with a coordinated box covered in organic cotton with a Salt and Pepper texture.

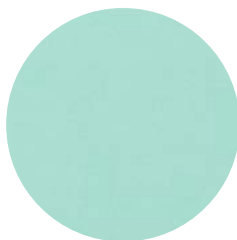

COLORS

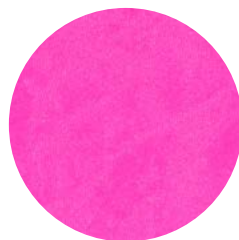

PINK

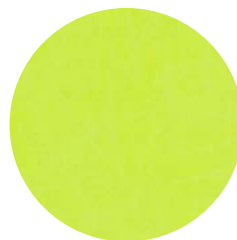

BLUE

WATER GREEN

FUCHSIA

LIME GREEN

Customization of the cover

HAPPY COLOR offers two different types of Debossing for customizing the album cover:

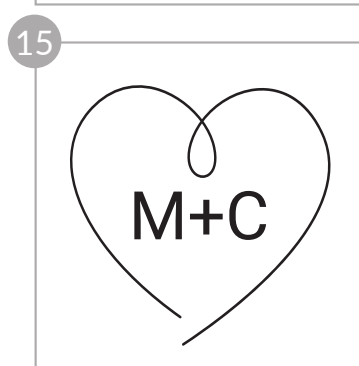

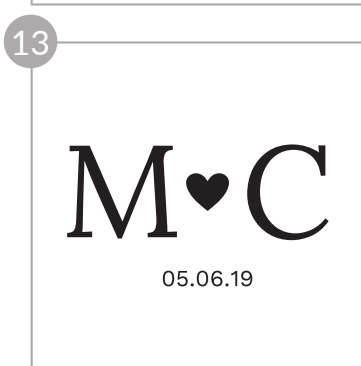

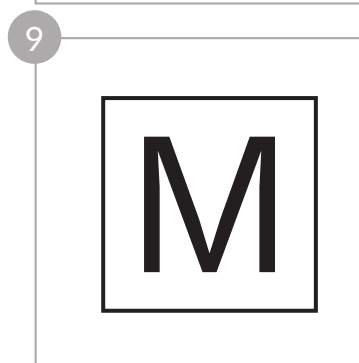

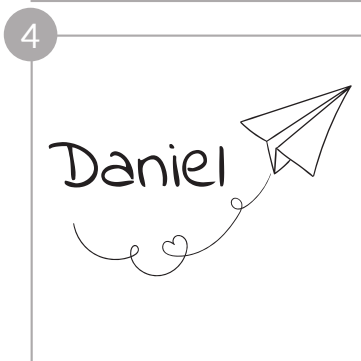

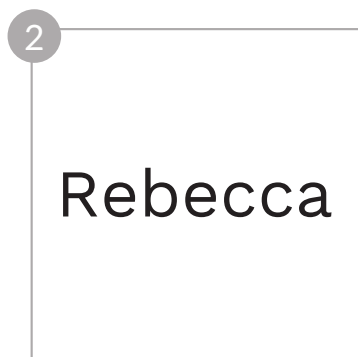

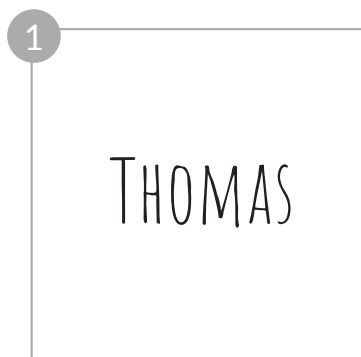

Natural Debossing, obtained with a simple hot incision that creates a delicate tone-on-tone effect in the relevant part (design and lettering).

Debossing+ White Sheet, which makes it possible to color the inside of the hot engraved surface, by transferring the white color where there is the design and lettering.

To ensure the best aesthetic result, we have prepared for you fifteen predefined graphic themes optimized for Debossing.

Coordinated albums and slip-cases are available in four formats:

HAPPY COLOR 30x20 cm

album	30x20 cm
coordinated box	32x22x6 cm

Paper for the inside

The HAPPY COLOR photo albums are “layflat”, with 180° panoramic opening and high thickness pages. You can choose to print HAPPY COLOR using traditional chemical Printing or the Fine-Art Full HD Printing, unquestionably the best printing technology for photographs.

For the inside, five different types of photographic paper are available. Starting from the Satin photo paper to the Fine-Art paper, a wide range of surfaces that will allow you to make those happy moments unforgettable and enhance your best shots.

Satin photo paper

High whiteness, slightly pearly surface. Clear print, excellent depth of color and reduced reflections.

Silk photo paper

Surface with a silky texture, bright points of light, intense spectrum of colors, smooth gradations in shadows.

Metal photo paper

Glossy, highly reflective paper, with silver iridescence. High color density, sharpness and deep blacks.

Velvet photo paper

Extra-matt with total absence of reflection, extremely pleasant and velvet to the touch. High added value.

Fine-Art [Full HD]

Full HD matt Fine-Art photographic paper, ideal for artistic photos and edition, meeting the conservation requirements of museums and art galleries. Perfect Black and Whites.

Guest Album

Your happiest moments become even more intense if shared with your friends, witnesses and family. You can print smaller albums for every one of them, maintaining the proportions and same layout of the main Album. It is not necessary to lay out the album again; it is sufficient to choose the “Guest Album” option when ordering.

Two types:

EXCLUSIVE GUEST ALBUM

- Cover completely coated in organic cotton with Salt and Pepper texture
- Inside printed in digital offset on 200-gram paper
- Softcover, with cut at the centre

PHOTOFLAT GUEST ALBUM

- Cover completely coated in organic cotton with Salt and Pepper texture
- Inside printed on satin photographic paper
- Same binding as the main Album (with panoramic 180° opening)
